+ local knowledge;

“we are proud of our reputation of technical excellence”

UNICOM INTELLEXT LIMITED (UIL) is a limited liability company formed under Companies Act 1994. It is a for-profit company. Ownership sojourns with the shareholders. We believe superior development outcomes can be achieved by harnessing the power of information and communication technology. We are uniquely positioned at the intersection of technology and development to fulfill our commitment of bringing innovative and sustainable development solutions to our clients.

Our greatest resources are our human resource, and we use a “coaching for success” approach to resolve any performance issues with individuals. If the issue is with an associate, a similar approach is taken for administering it.

We, being new in the development sector, view the process of consultancy as a sequence of phases, including: entry, contracting, diagnosis, data collection, feedback and implementation.

We believe, any engagement’s usefulness to an organization depends on the degree to which members reach accord on the nature of problems and opportunities; failure of which results in misdiagnosis, irrelevant recommendations and an incomplete picture of the statistics. To provide sound and convincing recommendations, we try to be persuasive and have finely tuned analytic skills. But more importantly, we have the ability to design and conduct a process for (1) building an agreement about what steps are necessary and (2) establishing the momentum to see these steps through.

The UNICOM Advantage

Finding the ideal synergy in emerging markets is a daunting task. Often reluctant to go deep into the business case resulting in institutional voids endemic to such markets. Addressing the gap in the literature concerning the role of consultancy firms in emerging markets, UNICOM Intellect Limited fills these institutional voids in order to facilitate our partners secure, implement and deliver impressive results.

We buttress our main argument by combining strands of institutional theory with the resource-based view. Acknowledging the tensions inherent in the practice of consultancy firms, we explore the critical aspects of the firm's internal and external environment and formulate a multi faceted approach to derive results.

Our focus remains with the objectives and activities of any synergy in sync with sustainability and growth. Our team of dedicated key industry professionals and long-term public relations ensure challenges of the past become doors to the future.

what we do;

We assure quality through clearly communicated with each staff. A robust performance appraisal system to motivate our human resource to maintain a high standard. We mostly involve in-house Experts composing of a team of highly motivated young professionals focusing on practical solutions. We believe in professionalism. Hence, to us timely and accurate completion of the task is of utmost importance. Our core quality objective is meeting and exceeding client expectation by understanding their requirements through due diligence and close interaction. Empower the employees, encourage participation and foster teamwork mentality. Making the employees responsible for their respective tasks and rewarding them accordingly. The objective is always to exceed the benchmark previously set and achieving higher standards. There will always be a constant evaluation of the services being provided and correction of any deviation that might occur, from the art of UIL.

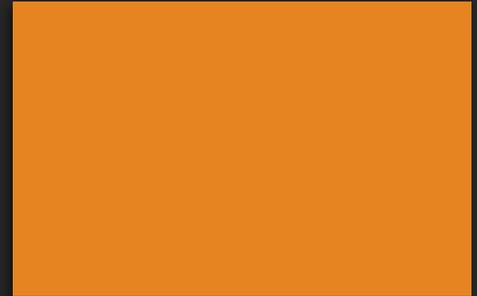

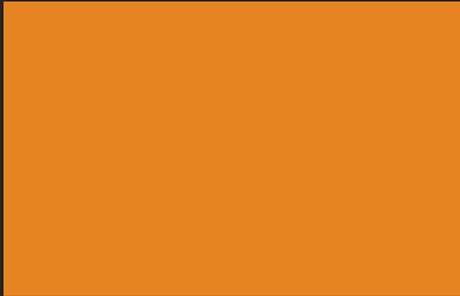

We believe, consulting success depends solely on analytic expertise and on an ability to present convincing reports is losing ground, partly because there are now more people within organizations with the required analytic techniques than in the boom years of "strategy consulting." Hence, we define our objective as not just recommending solutions but also help institutionalizing more effective management processes.

“to leverage core expertise; we partner with some of the best in class companies to deliver solutions individually tailored to the needs of our clients across the globe”

services;

core competencies:

Feasibility, Planning and Performance Review

Failure to plan; is planning for failure. Our holistic approach to planned development takes into consideration a myriad of factors involving a multi disciplinary team of experts to provide inputs. UNICOM with its team of professional associates are fully qualified and capable of undertaking urban, regional, local and strategic planning studies for various sectors of development.

Risk Assessment, Testing and Management

We maintain in-house expertise & software tools to determine risk levels as part of engineering studies for acceptability of proposed master plans, controls & safeguard mechanisms of facilities, industries, upstream and downstream oil and gas developments. In addition to providing client specific management studies; our unique model developed over the years applies a multi-dimensional assessment testing modules that gives our clients to choose from various options depending on the nature and stage of their project.

Risk Assessment, Testing and Management

Since its inception, UIL has provided technical and management advisory services to both the government and the private sector. UIL has provided advisory and support services on various sectors; from public finance, waste management, environmental and city planning, maritime & ICT. We conduct advisory and feasibility studies that are time sensitive, complex and requires thorough up to date knowledge of the subject matter. UIL deploys its own experts in various fields. Ranging from intelligence/cyber security, environmental planners, ecologists, engineers to doctors, economists and actuaries.

overwhelming challenges; simplified solutions.
